# Public Voices in AI

People's Advisory Panel (2024–25)

The **PVAI People's Advisory Panel** has been made up of **six members of the public** from across the United Kingdom, recruited on the basis of varied past experience of public engagement on AI. It was created to provide advisory input to the Public Voices in AI research programme, offering input to work-package leads through regular facilitated Zoom meetings.

The six members of the panel: Margaret, Sharif, Samer, Farheen, Cameron and Adam draw on their lived experience in different communities across the UK to help PVAI reflect on the who, why and how of public involvement, and how PVAI research and research outputs might be received in different settings.

CONNECTED BY **DATA** is a not-for-profit organisation campaigning for communities to have a powerful say in decisions about data and AI. Having previously run the People's Panel on AI (in November 2023) the PVAI team contracted **CONNECTED** BY **DATA** to run the project's Advisory Panel.
